5. Una vez tengas tu cuenta creada, ve a la pagina de inicio de tu perfil por medio del icono en la parte superior izquierda

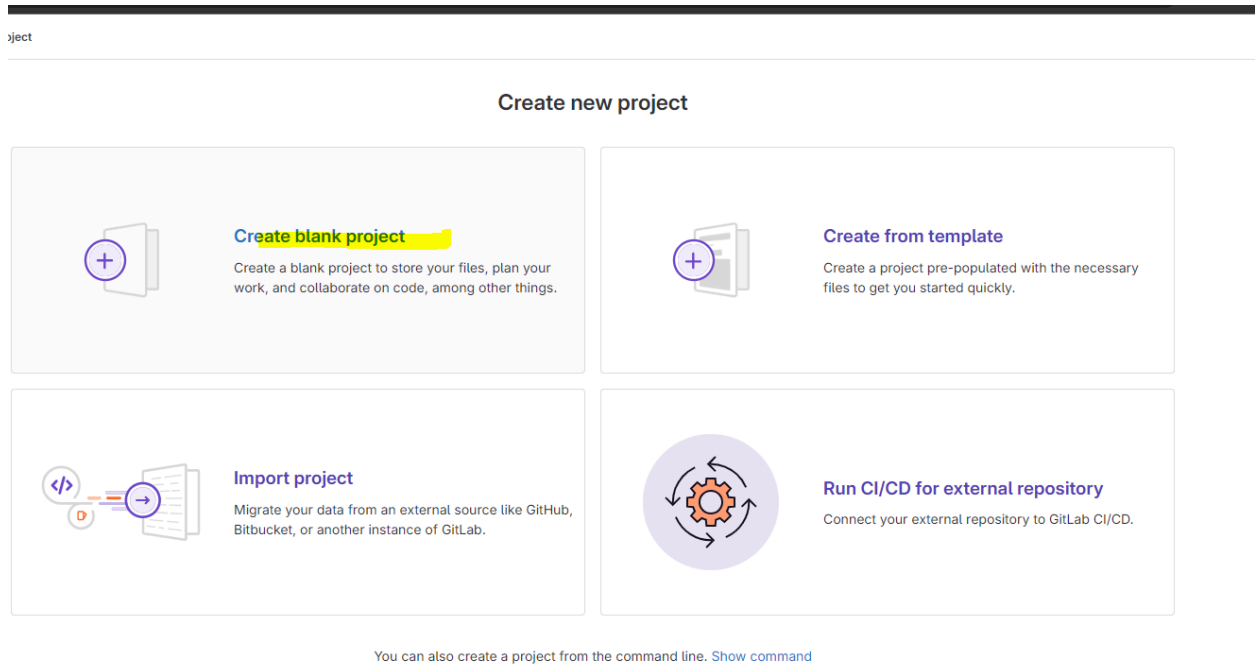

6. Click en 'Projects'

7. Click en New Project

8. Puedes escoger crear un proyecto en blanco, importar, correr un proyecto de un repositorio externo o usar una template (aqui usaremos uno en blanco)

9. Dale un nombre a tu proyecto 'Control de Versiones' y escoge tus opciones de visibilidad y configuración

Create blank project

Create a blank project to store your files, plan your work, and collaborate on code, among other things.

Project name

Must start with a lowercase or uppercase letter, digit, emoji, or underscore. Can also contain dots, pluses, dashes, or spaces.

Project URL

Project slug

Project deployment target (optional)

Visibility Level [?](#)

- ☒  **Private**
Project access must be granted explicitly to each user. If this project is part of a group, access is granted to members of the group.
- ☐  **Internal**
The project can be accessed by any logged in user except external users.
- ☐  **Public**
The project can be accessed without any authentication.

Project Configuration

- ☒ **Initialize repository with a README**
Allows you to immediately clone this project's repository. Skip this if you plan to push up an existing repository.
- ☐ **Enable Static Application Security Testing (SAST)**
Analyze your source code for known security vulnerabilities. [Learn more.](#)

10. Click en 'Create Project'
